<u>Task 1</u>

HTML Text Formatting

---

1. The Paragraph & Break Tags

This is a standard paragraph used for writing articles or blog posts.

Upflairs Office
100/110ps, Rana Sanga Marg
Jaipur, Rajasthan

---

2. Bold vs. Strong

Use case 1: The product name is **SuperWidget 2000**.

Use case 2: Vocabulary words like **Photosynthesis**in a textbook.

Use case 1: **Warning:** Do not touch the hot stove!

Use case 2: **Important Note:** The exam is tomorrow at 9 AM

3. Italic vs. Emphasis

Use case 1: The ship was named the *Titanic*.

Use case 2: *I wonder if it will rain today,* she thought.

Use case 1: You *must* complete all assignment on time.

Use case 2: That was a *huge* mistake!

---

4. Underline, delete, and Mark

Use case 1: The word calenderis misspelled.

Use case 2: Please read the following instructions carefully.

Use case 1: Original Price: ~~$50.00~~ Sale Price: $39.99.

Use case 2: The meeting is on ~~Monday~~ Tuesday.

Use case 1: Here are your search results for HTML tags.

Use case 2: Please review this section before the test.

Use case 1: Here are your search results for HTML tags.

Use case 2: Please review this section before the test.

---

5. Small, Superscript, and Subsript

Use case 1: Copyright 2026 All Rights Reserved.

Use case 2: Terms and conditions apply.

Use case 1: The area of the square is 25 cm^2.

Use case 2: Today is the 15^{th} of the month.

Use case 1: The chemical formula for water is H_20.

Use case 2: Logarithm base 10 is written as $\log_{10}$.

Block vs. Inline Elements

Block Elements: These elements start on a new line and ake up the full width available. Examples include `<p>, <h1>, and <hr>`.

`**Inline Elements:** These elements do not start on a new line and only take up as necessary. Example include <b>, <strong>, and <mark>`

Task 2

HTML Character Entities Reference

A List of 20 useful HTML entities displayed in a two-column layout.

Column 1: Symbols & Math		Column 2: Currency & Punctuation

Task 4

Classic Chocolate Chip Cookies

Tip: Make sure your butter is at room temperature for the best results!

Ingredients

- 2 ¼ cups all-purpose flour
- 1 ½ teaspoons baking soda
- ½ teaspoon salt

shutterstock.com · 2563269917

Tip: Make sure your butter is at room temperature for the best results!

Ingredients

- 2 ¼ cups all-purpose flour
- 1 ½ teaspoons baking soda
- ½ teaspoon salt
- 1 cup unsalted butter
- ¾ cup granulated sugar
- 2 large eggs

Instructions

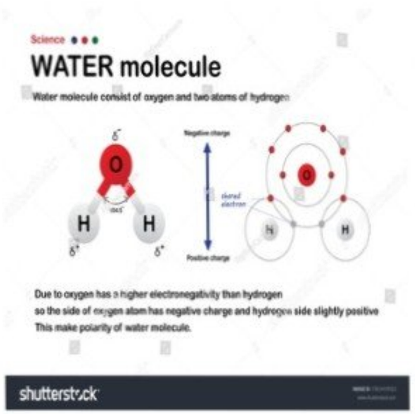
Important Note: Do not overmix the dough once you add the flour!

1. Preheat your oven to 350° F.
2. In a medium bowl, whisk together the flour, baking soda, and salt.
3. In a large bowl, cream the butter and sugar until light and fluffy.
4. Add the eggs one at a time, mixing well after each.
5. Stir in the dry ingredients gradually.
6. Bake for 10-12 minutes until the edges are golden brown.

<u>Task 1</u>

Fascinating Science & Math Facts

Chemistry Basics



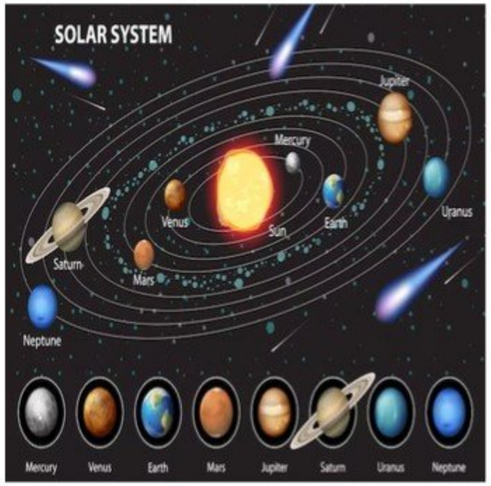
One of the most essential molecules for life on Earth is Water.

The chemical formula for water is H_2O, meaning it contains two hydrogen atoms and one oxygen atom.

One of the most essential molecules for life on Earth is Water.

The chemical formula for water is H_2O, meaning it contains two hydrogen atoms and one oxygen atom.

Physics & Astronomy



Albert Einstein's famous equation for mass-energy equivalence is $E = mc^2$.

The distance from the Earth to the Sun is approximately 1.496×10^8 kilometers.

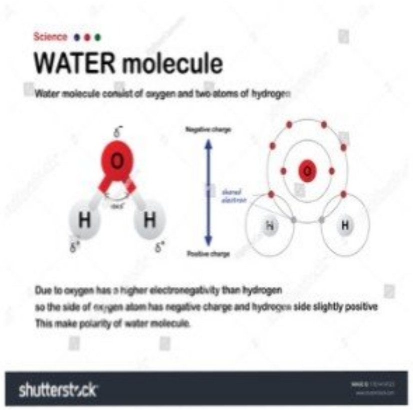
Task 5

Fascinating Science & Math Facts

Chemistry Basics



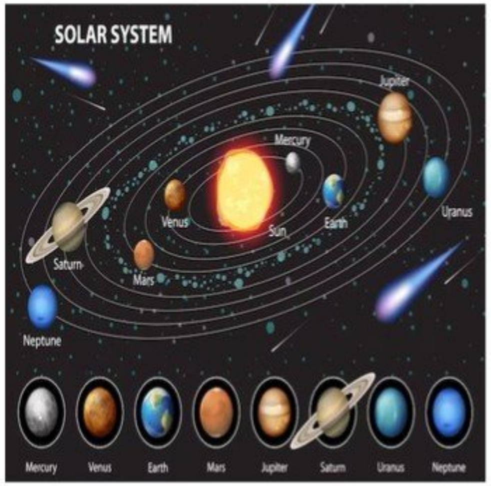
One of the most essential molecules for life on Earth is Water.

The chemical formula for water is H_2O, meaning it contains two hydrogen atoms and one oxygen atom.

One of the most essential molecules for life on Earth is Water.

The chemical formula for water is H_2O, meaning it contains two hydrogen atoms and one oxygen atom.

Physics & Astronomy



Albert Einstein's famous equation for mass-energy equivalence is $E = mc^2$.

The distance from the Earth to the Sun is approximately 1.496×10^8 kilometers.

Math Logic Symbols

In mathematics, we use various symbols to compare values:

- Multiplication: $5 \times 5 = 25$
- Division: $10 \div 2 = 5$
- Not Equal To: $10 \neq 11$
- Less Than or Equal To: $4 \leq 5$
- Greater Than or Equal To: $8 \geq 8$
