

## Task 1 : Navigation Menu

[Home](#)[About](#)[Services](#)[Resources](#)[Contact](#)

### Welcome to Our Website

This is the home section. Use the navigation bar above to jump around the page.

[Back to Top](#)

# About Us

We are learning Full Stack Web Development. It's a challenging but rewarding journey!

[Back to Top](#)

# Our Services

We build structured HTML pages, format text, and create navigable documents.

## **Task 2 : Bookmarked Table of Contents**

### **Table of Contents**

- 1. Introduction to Web Basics
- 2. HTML Structure
- 3. CSS Styling
- 4. JavaScript Logic
- 5. Backend Engineering
- 6. Database Management
- 7. Working with APIs
- 8. Project Deployment

## 1. Introduction to Web Basics

The internet is a massive network of computers. Web development starts with understanding how browsers and servers communicate.

[↑ Return to Contents](#)

## 2. HTML Structure

HTML is the skeleton of the web, providing structure through tags, elements, and attributes.

[↑ Return to Contents](#)

## 3. CSS Styling

CSS is the skin and clothing of the web, responsible for colors, layouts, and responsive design.

[↑ Return to Contents](#)

## 4. JavaScript Logic

JavaScript is the muscle, adding interactivity, animations, and complex logic to web pages.

[↑ Return to Contents](#)

## 5. Backend Engineering

The backend handles the server-side logic, user authentication, and data processing.

[↑ Return to Contents](#)

## 6. Database Management

Databases securely store user information, product details, and application states.

[↑ Return to Contents](#)

## 7. Working with APIs

APIs allow different software systems to talk to each other and share data.

[↑ Return to Contents](#)

## 8. Project Deployment

Deployment is the final step, where we push our code to a live server for the world to see.

## Task 3: Weekly Grocery & Shopping Planner

### Unorganized Wish Items (UL)

- Fresh Apples
- Whole Wheat Bread
- Almond Milk
- Coffee Beans
- Dark Chocolate Bar

### Step-by-Step Checkout Process (OL with Nested UL)

1. Review items in your shopping cart.
2. Proceed to the checkout counter.
3. Provide payment method:
  - Credit/Debit Card

- Credit/Debit Card
  - Cash
  - UPI/Mobile Wallet
4. Collect your printed receipt.
  5. Bag your groceries and take them to your car.

## Grocery Product Glossary (DL)

### **Organic**

Food produced without synthetic fertilizers or pesticides.

### **Gluten-Free**

Products that exclude a protein composite found in wheat and related grains.

### **Perishable**

Goods that have a limited shelf life and must be refrigerated.

### **Bulk Bin**

A section where you can buy dry goods like rice and nuts by weight.

### **UPC**

Universal Product Code, the barcode scanned at the register.

# Task 4: Course Curriculum

## Full Stack Web Development Curriculum

Jump to: [Week 1](#) [Week 2](#)

### Curriculum Overview

---

#### I. Week 1: Web Fundamentals

##### A. Module 1: Introduction to HTML

1. Topic: Boilerplate and Elements
2. Topic: Lists and Anchor Tags

##### B. Module 2: HTML Forms and Tables

1. Topic: Input types
2. Topic: Table structures

#### II. Week 2: Styling the Web

##### A. Module 1: CSS Basics

- a. Topic: Selectors and Colors

2. Topic: Table structures

## II. **Week 2: Styling the Web**

### A. Module 1: CSS Basics

a. Topic: Selectors and Colors

b. Topic: The Box Model

### B. Module 2: Advanced Layouts

a. Topic: Flexbox

b. Topic: CSS Grid

---

## **Key Course Terms (Glossary)**

---

## Task 5

# My Useful Resources

## Category Definitions

### **Design**

Resources for color palettes, typography, and UI/UX inspiration.

### **Development**

Documentation and reference materials for writing clean code.

### **Learning**

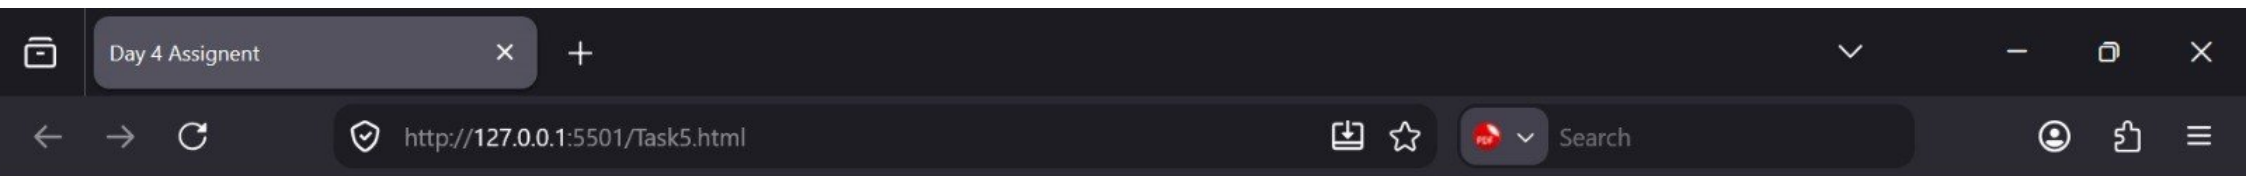

Platforms offering tutorials, courses, and interactive coding environments.

### **Tools**

Software and web apps used to optimize the developer workflow.
